

Saurabh Kailas Damale

Full Stack Developer · Laravel Specialist · Mumbai, India

+91 7709131547 | saurabh.damale.developer@gmail.com | saurabh-damale-developer.site | github.com/HackRoot1

PROFESSIONAL SUMMARY

Full Stack Developer with 12+ months of professional experience specialising in Laravel backend development and building scalable e-commerce and ERP systems. Proven expertise in designing optimised RESTful APIs, integrating payment gateways (Razorpay, PhonePe), and managing multi-warehouse inventory systems. Delivered 3+ production-grade applications currently serving real business operations, including a 40% improvement in API response time and an 85% reduction in manual stock reconciliation.

CORE SKILLS

Backend: PHP, Laravel 11/12, RESTful APIs, API Documentation, Database Design & Optimisation

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS, Bootstrap, AJAX

Databases: MySQL (query optimisation, indexing, replication), MongoDB

Payments & Integrations: Razorpay API, PhonePe Gateway, SMS Gateway, Firebase

DevOps & Deployment: VPS Management, Hostinger, AWS, Git/GitHub, Postman

Other: API Testing, Database Migrations, Performance Optimisation

PROFESSIONAL EXPERIENCE

Laravel Developer — Technofra

Feb 2025 – Present · 12+ months

Developing and maintaining multiple production-grade applications with a focus on scalability, API performance, and code maintainability.

Crackteck — Full-Stack E-Commerce Platform

- Architected and built complete backend system with RESTful APIs serving frontend and mobile clients
- Integrated PhonePe payment gateway with end-to-end transaction reconciliation
- Implemented SMS gateway for real-time order status notifications
- Optimised database queries, reducing API response time by 40%
- Production system handling hundreds of daily transactions

Tech Stack: Laravel, MySQL, RESTful APIs

Headquarters — ERP & POS System

- Designed and implemented multi-warehouse inventory management system across multiple locations
- Built purchase order workflows with multi-level approval chains
- Created real-time stock synchronisation, reducing manual reconciliation by 85%
- Optimised database indices for high-frequency inventory queries

Tech Stack: Laravel, MySQL, Advanced Database Indexing

Yashtools — E-Commerce Product Platform

- Developed product catalogue module with advanced filtering and search capabilities
- Built order management system with full status tracking and history

Tech Stack: Laravel, MySQL

PERSONAL PROJECTS

CraveBox — Restaurant Management System

- Full-featured Laravel application enabling restaurant owners to manage menus, reservations, and real-time orders
- Integrated Razorpay for secure payment processing with automated order confirmation
- Built responsive admin dashboard with role-based access control and user authentication

Tech Stack: Laravel, MySQL, Bootstrap, Razorpay API, Blade Templating

GitHub: <https://github.com/HackRoot1/CraveBox>

OrbitTasks — Task Management Application

- Built full-stack task management platform with AJAX-powered real-time CRUD operations (no page reloads)
- Implemented secure user authentication with session management
- Responsive design optimised for both mobile and desktop

Tech Stack: HTML5, CSS3, JavaScript, jQuery, AJAX, PHP, MySQL

GitHub: <https://github.com/HackRoot1/OrbitalTasks>

KEY ACHIEVEMENTS

- Delivered 3+ production-grade applications currently serving real business operations at Technofra
- Optimised database performance resulting in 40%+ improvement in API response times on Crackteck
- Reduced manual stock reconciliation by 85% through real-time inventory sync on Headquarters ERP
- Integrated multiple payment gateways (Razorpay, PhonePe) with secure transaction handling
- Successfully managed VPS deployment and server configuration on Hostinger and AWS

EDUCATION

Master of Science — Information Technology

Sonubhau Baswant College, Shahapur ·

CGPA: 8.70 / 10

Bachelor of Science — Information Technology

Sonubhau Baswant College, Shahapur ·

CGPA: 8.70 / 10

CURRENTLY LEARNING

- Advanced system design patterns — HLD/LLD and microservices architecture
- Multi-tenant application design and Redis caching optimisation
- Data structures and algorithms for technical interview preparation
- Flutter mobile development for expanded cross-platform skillset
